

The Southern California Tribal Digital Village is asking the FCC to please support and facilitate mesh networking, Not Obstruct or jeopardize, in any way, the primary function in this band of low-power transmissions at the community level. This form of wireless broadband is proving to be the most effective solution for delivering connectivity to the Tribal home on several of our reservations. Please Do Not Establish a first-in-time, first-in-right site licensing regime for high-power in a so-called "unlicensed" frequency. We feel that it will set a precedent that is fatal for the future of Unlicensed Bandwidth.

Thank you for considering this...  
Respectfully,

mrr
